The Doctor's stuck in the Pandorica,
Amy might be dead and Rory's a Roman with a gun
inside his hand -
Seems like things aren't going as planned

River's in the TARDIS,
The TARDIS is on fire,
She's feeling the heat,
On repeat she'll require,
Someone she can trust,
Someone with a bow tie,
But he's been locked up
And left to die.

Oh my God what will they do
Seems impossible to get through,
My mind is blown I bet yours is too,
Well I guess this is Doctor Who.

Rory's quite distressed and he starts to sob
When the Doctor appears with a mop,
"Get me out of the Pandorica."
"But you're not in the Pandorica."
"Yes I am, well, yes I was, it's complicated but I won't
explain it now because... "
Then he disappeared into a hazy fuzz,
That man I can't explain why he does the things he
does.

Oh my God I don't have a clue
These paradoxes are hard to construe
My mind is blown I bet yours is too,
Well I guess this is Doctor Who.

It's the Big Bang Two and I need to review what on
earth just happened before my eyes.
Time has gone askew the universe has too
I'll try and explain to you the Big Bang Two,
The Big Bang Two.

The Doctor's got River's vortex manipulator,

Which he'll use to meet Rory 2000 years later
When they meet Amy after her sleep in the box.

They realize the sun is really the exploding TARDIS.
Doctor saves River from the imitating star.
This woman watches back can't help but point out the
obvious.

Oh my God he's wearing a fez,
Oh my God he's wearing a fez,
Oh my God he's wearing a fez,
Oh my God he's wearing a fez.

Dalek pops up out of nowhere
Shoots the Doctor kills him quite unfair
He jumps back 12 minutes to the stairs,
He's dead,
And everyone despairs.

Little do they know the Doctor lies
He's gone stopping the universes demise.
Amy says her last goodbyes,
Doctor flies up into the skies.

The universe is back it's true
But the Doctors said his final adieu,
Maybe you'll come back if she remembers you.

It's the Big Bang Two and I need to review What on
earth just happened before my eyes.
Time has been renewed the universe has too,
But Amy still can't help but cry.

Someone's missing, the question's who.
Then she remembers -
Something old,
Something new,
Something borrowed,
Something blue.
And that's the Big Bang Two.
I hope it didn't confuse you.
