"Nobody Knows"

Visit "[Nobody Knows](#)" on MotoLyrics.com

Rejoice for what is coming
Smile for we are one
You are part of my future
And thats as bright as they come
As they come
Just because we're heavy
You don't have to be held down
Just make sure you're ready
For your trip this time around, around
In your company I'm quickened
I move inwards when we speak
We're all heavy with instruction
We're all fragile in defeat, in defeat
Just because we're heavy
You don't have to be held down
Just make sure you're ready
For your trip this time around, around
Around around around around around
Around around
Around around around around around
We are defined by our mistakes
An open mind is all it takes
Just because we're heavy
You don't have to be held down
Just make sure you're ready
For your trip this time around, around
Around around around around around
Around around
Around around around around around
Around around
Around around around around around
