I'll be the one to look in to you find the innocence
You'll be the one who's out there laughing at my
ignorance
As time will tell, our lying shells, we'll never work it out
Let's stand together til we hear the others make a
shout

If I go sing what you sung
If I go bring what you brung
If I go off in to the night well then the wars begun
If I don't know who I am
And you don't know where you stand
This silhouetted shadow fades in to our own demands

Dance dance with me tonight
We'll make this summer right
Dance dance with me tonight
We'll make this summer right
We'll take a chance and we'll break in to the open

Somehow I never seem to think about the consequence
A win for you is just a loss achieved at my expense
As time will show, my mind will grow to halt this
endless fight
Let's stand together til we have an answer in our sight

Dance dance with me tonight
We'll make this summer right
Dance dance with me tonight
We'll make this summer right
We'll take a chance and we'll break in to the open
