Words that no one understands
I here these words In my head
you know where they talk about
about the dead(about the dead)
They told me I needed to kill
they told they will be with me

Words that no one understands
i hear these words in a rime
i hear these words all the time
there's no way to Escape

They told me I don't need to be afraid of them
they told me i was scared
I dont know how they know those things
They hold me in the darkness
I'm hopeless

Words that no one understands
i hear these words in a rime
i hear these words all the time

there's no way to Escape

Then you came and wishper to me
Believe In me

Words that no one understands
i hear these words in a rime
i hear these words all the time
there's no way to Escape

Words that no one understands
i hear these words in a rime
i hear these words all the time
there's no way to Escape
