

Lady Radiator "Ready Explode"

Visit "[Ready Explode](#)" on MotoLyrics.com

Oh those lines signal affairs I know 'cause I don't
want to be used
Issued the mallet of perfection puzzling the whore's
filth.
Now let's shout finish your views on how you think its
best to be abused heels used
I guess I'll never hear another word again

Some people use people you gotta let people think
people
(You're lost and fake)

Close your eyes and picture me, now pencil in your
secrets about.
How your breast were formed evenly without the
medicine.

You figured we learned to stick it out heads up you got
a lot to know.
It's bigger than you Know bottled up ready, explode.
You figured we learned to stick it out.
Ready, Explode

Face it you got a little bit of sonar (boom, boom,
boom!)
Watch your open eyes
Face it you got a little bit of sonar and its burning up

You figured we learned to stick it out heads up you got
a lot to know.
It's bigger than you Know bottled up ready, explode

Oh those lines signal affairs I know cause I don't want
to be used
Issued the mallet of perfection puzzling the whore's
filth.
Now let's shout finish your views on how you think its
best to be abused heels used
I guess I'll never hear another word again
