In the beginning god created everything  
He created man to rule all things  
He gave us a mind for us to discover  
To live in unity not to hate eachother  
One unification of racial discrimination  
We are all one people from the same generation  
Black or white its just a color of pigmentation  
So lets join hands and work for unification

It's the senuus came in of black and white  
Some promoting peace others promoting fight  
People cant you see that could never be right  
So lets join together and for love we will fight  
It's a consipiricy for some to make a livin  
Thinkin as an individual and not for others wealthy  
Lets eliminate those guys from the system  
Or else its guna be a forever something
