Billy club has got his strength it places him above them
the feeble incompletes billy club has found his pride he
looks down on their state the verdict justified it's self-
defense it's vigilance it's nature's call oppose them all
the lesser ones are the vital threat he needs them billy
club has got his faith he's followed every lead set down
in history billy club has found his place it's comforting
and cold it's here he realized his role and here it
comes that old defense he's consequence but he has
chosen the iron grip his billy club desensitized. he's
everywhere he's anyone. he's every... billy club has got
his strength for this world [repeat]
