In the midnight

We hurry up like every day  
Time after time but it's ok  
Nobody knows what's going on  
Another chance the same old song.

You're dancing low you turn not 'round  
Looking for love it must be found  
And time goes by the race is on  
The nights are night (?)

In the midnight, In the midnight we all cry for love  
In the midnight, In the midnight we all cry for love  
In the midnight, In the midnight we all cry for love  
In the midnight, In the midnight we all cry for love  
We DJ plays the song you need  
Another dance another feet  
People start to slip ..... (?)

The people need to make it all play  
You feel the heat you want the rise  
The neonlights they hypnotize  
'cause everybody knows that's love around  
Waiting for you - where are you now?

In the midnight, In the midnight we all cry for love  
In the midnight, In the midnight we all cry for love  
In the midnight, In the midnight we all cry for love  
In the midnight, In the midnight we all cry for love
