In the beginning
Breath
In the beginning
Dust blows
In the beginning
Rotating swells
In the beginning
You are so
In the beginning
Hands brush
In the beginning
Harvest comes
In the beginning
Only love
Only us
Only us

And I am spinning clouds
And I am winning points now
And I pressing past the veils
There is a resting place with you

And we are everything soft
And we are everything crazy
And we are ready, only love
Only us
Only us

And I will follow you wherever
And I will follow you whatever
And I will follow you wherever you go
And I will follow you now

In the beginning
Breath
In the beginning
Hands touch
