It's a long lonely road  
Where do I go  
Looking for someplace that feels like home  
Been searchin' so long  
Where did I go wrong  
Maybe the answer's somewhere beyond

The stars in the sky  
And who knows why

*[Hook:]*

We all fall down  
Life's taking it's toll  
It's all out of control  
Yeah we all fall down  
It's my dignity that's saving me tonight

As I walk through this maze  
Is this just a phase  
Will all my tomorrows be this way  
The night is so black  
In front and in back  
Sometimes it's so dark and you don't know where  
you're at

Like a star way up high  
Droppin' out of the sky

*[Hook]*

*[Bridge:]*

Lift me up  
So I can see  
Outside of me  
And what could be  
A different life

*[Hook-fade]*
