Chorus :

Too many nights too many fights too many years too  
many tears  
too many times that we laughed together  
too many moons that we shared together  
too many nights too many fights too many years too  
many tears  
too many times that we laughed together  
too many moons that we shared together

Girl, you was the light of my life  
you were the girl that I would call my wife  
you drove me wild love and honesty  
you cared for me I cared for you  
and there was nothing that I wouldn't do  
your love motivated me to live each day  
and if it wasn't for you I might be dead today  
you got my head on straight you got me out the streets  
you're the type of girl that came with true love to me

Every you girl I wish and I pray for blessings  
we had many sessions talking the end of lessons  
'bout the facts of life husband and wife  
being riches like a full count without the strikes  
and yea baby with you I really had no fears  
since you've been gone out my life I shed many tears  
wish I could bring you back wish I could hold you tight  
and if I could baby I would hold you all night

chorus (x2)

It was a nice day the sky blue  
who would've thought this'd be the last day I see my  
boo  
I wonder who could relay to the things that I'm going  
through  
I love you girl when I miss you well this is true  
a fatal car crash took you out my life forever  
together we would make it through the worst weather  
I got a phone call said that you've been hurt bad  
and also I still got a chance to be a dad

hung up the phone and screamed: God please bare my  
lady  
but if you take her lord I beg you please bare the baby  
got to the hospital they said you's in operation  
I'm walking back and forth filled with anticipation  
I'm facing the worst thing in my life ahead  
the doctor comes out tell me that my girl is dead  
dropped to my knees I couldn't even stand and cry  
he said: I'm sorry the baby he also died

chorus (x2)

\* Music until fade
