#### Verse 1:

Right turn fall down  
You're there to pick me off the ground  
And I can't tell ya how you've turned my world around  
You come closer your blue eyes  
Have won me over and  
I'll never be the same without ya  
Here with me through the sun and the rain  
I thought you should know that you're my hero

#### Chorus:

Let's grow old together  
With my heart in your hands and your hands holding  
mine  
We'll face the world together  
Cause you are the one I've been waiting to find  
It's no secret so I can't keep it  
Cause it's true,  
Baby I love you

#### Verse 2:

Long day Come home  
When you're there I never feel alone  
And my cares melt away into your arms again  
Your smile takes me  
Just awhile to remind myself to breathe  
Cause your still the most amazing thing I've ever seen  
I thought you should know that you'll always be my hero

#### Bridge:

Years turn us gray but my heart still jumps when you're  
next to me  
I feel so safe cause you're still by my side on those  
cloudy days and  
I'm so amazed by, you
