Trew it all away
That's a shame
When your formative years looked so promising
The things you'd never do
You did for two
And while you were away
-Life's a parade (x2)

It's easy right from wrong
But it's sad
How you always seem to hurt the ones you love
Just being who you are

Where we've been for so long
Maybe I can tag along
We forget where we come from
We can stay

Where you been for so long
And it wasn't anyone
That you told it would be from
If I stay

Where we've been for so long
Maybe I can tag along
We forget where we come from
We can stay

Where you been for so long
And it wasn't anyone
That you told it would be from
If I stay
