Put up your hands
And up your guns
New war is a fake peace
You like to shout
Against my face
You say hello, killing!

I swear I love, I live, I die
No way to get truth in your eyes!
You want me lost
You want me dead
You sold your soul for business

The things that I loved are falling on me
Dark built the new world..
You re burning inside, you re chocking your lungs
For money and for death..

Iron rain on our heads

As a cage trapped us in
Grinning lies on their mouth
Hypnotizing with a screen

They want! They catch! They win! They kill!
They burn! They steal! They war! They peace!
I swear I love, I live, I die
No way to get truth in your eyes!

The things that I loved are falling on me
Dark built the new world..
You re burning inside, you re chocking your lungs
For money and for death.. (I close my eyes! stars save
me now)
