Come around

Come around when you want some

I've been used

Losing these years

Tight grip

Another night spent on the mattress

So confused by you here

Love the sound

Love the sound of your own voice

I still crash

Hearing screaming

Tight grip

Another night trapped

In another fight

Lost in another place

Space takes a second

See?

It's over, it's over

I can give you anything and

Everything you ever wanted!

Your deceptive eyes connect with mine

I know you got a secret

Lie to me

You hypnotize inside the signs

I know you got a secret

Lie to me

Lie to me

So be here now

'Cause this is the best part

We'll watch you burn

The ground I walk on

That I walk on

You stand there proud

But you don't deserve it

You'll always bring a crowd

You'll always sell it out

Your deceptive eyes connect with mine

I know you got a secret

Lie to me

You hypnotize inside the signs

I know you got a secret

Lie to me

Lie to me

Just don't why I can't make you dance if I wanted to

Just don't know, I just don't know I know, I just don't
know, I...

Just don't why I can't make you dance if I wanted to!

Just don't know why I can't get you to dance!

Just don't why I can't make you dance if I wanted to!

Just don't know why I can't get you to dance!

Your deceptive eyes connect with mine

I know you got a secret

Lie to me

You hypnotize inside the signs

I know you got a secret

Lie to me

Your deceptive eyes connect with mine

I know you got a secret

Lie to me

You hypnotize inside the signs

I know you got a secret

Lie to me

Lie to me!

I know you got a secret

I know you got a secret

I know you got a secret

I know you got a secret

I know you got a secret

I know you got a secret

I know you got a secret

I know you got a secret
