You're taking me in like I'm your own
I'm sick of sitting on your little throne
You're out of time, until you let me in
Don't want to see it come around again

Chorus:

These little white lies tearing me inside
I can't forget the way you looked at me
These little white lies I can't see disguised
I can't forget all of your little white lies

You're taking me down like you've done before
I'm sick of seeing you walk out that door
You're out of time, until you let me in
Don't want to see it come around again

Chorus:

These little white lies tearing me inside
I can't forget the way you looked at me
These little white lies I can't see disguised
I can't forget all of your little white lies
All I want for you is just to go away
You can come out and play on another day
All I want is just some opportunity

Chorus:

These little white lies tearing me inside
I can't forget the way you looked at me
These little white lies I can't see disguised
I can't forget all of your little white lies

All I want for you is just to let me in
You can come out and play with another friend
All I want is just some opportunity

Chorus:

These little white lies tearing me inside
I can't forget the way you looked at me
These little white lies I can't see disguised
I can't forget all of your little white lies (3x)
