He says that he can read my mind, the power to turn  
iron into gold  
She says she's seen the other side  
And knows the place the fire burns all night

There is an answer to the question, so long ago down  
below  
It's a hard real life, every day  
Once you have it, it never goes away

Chorus:  
It's in the pocket, when you're really really lucky  
When your fantasy becomes reality, living inside your  
imagination  
It's in the pocket, when you're really really lucky  
When your fantasy becomes reality, living inside your  
imagination

Your magic of the secret door, I can take you down and  
show you more  
It's easy, once you know the way, it's farther than the  
closest thing you are

You've got to walk right through that fire, it will not burn  
you  
And the once you may love, only life won't make it, or  
just burn away

chorus

You've got to walk right through that fire, it will not burn  
you  
And the once you may love, only life won't make it, or  
just burn away

(Imagination) - repeats out
