He says that he can read my mind, the power to turn
iron into gold
She says she's seen the other side
And knows the place the fire burns all night

There is an answer to the question, so long ago down
below
It's a hard real life, every day
Once you have it, it never goes away

Chorus:
It's in the pocket, when you're really really lucky
When your fantasy becomes reality, living inside your
imagination
It's in the pocket, when you're really really lucky
When your fantasy becomes reality, living inside your
imagination

Your magic of the secret door, I can take you down and
show you more
It's easy, once you know the way, it's farther than the
closest thing you are

You've got to walk right through that fire, it will not burn
you
And the once you may love, only life won't make it, or
just burn away

Chorus

You've got to walk right through that fire, it will not burn
you
And the once you may love, only life won't make it, or
just burn away

(Imagination) - repeats out
