I heard the secrets from your heart.
You didn't want this from the very start.
I saw the pain in your eyes,
You've been feedin' me a whole bunch of lies.

Now it's gone for all too long
I always knew that you were wrong
Let's pick up the pieces and move on
Got to find the strength to be strong

Take what you want from me
Take what you want from me

Well I know that nothing is free
but if you take everything then there's nothing left for
me - ya
I know that nothing is free
But if you take everything then there's nothing left for
me - ya
Nothing left for me

What do you want to do to me
Do you wanna turn me
Into a suicide machine
What are you trying to make me be

Cuz I've been wrong for much too long
How could I have known that I was wrong
You were the one who wanted me to move along

Everything in my life always goes wrong

Take what you want from me
Take what you want from me

Well I know that nothing is free
but if you take everything then there's nothing left for
me - ya
I know that nothing is free
But if you take everything then there's nothing left for
me - ya

How could I have known
(You were the one to end it all)
I should have known
(I would have to take the fall)
If I could turn back time
(I'd be alot wiser then I am right now)
And if I could change your mind
(Would you show me how)

Let's go

Take what you want from me
Take what you want from me
Take what you want from me

(TAKE WHAT YOU!)
Want from me
(TAKE WHAT YOU!)
Want from me
(TAKE WHAT!)
You want from me
(TAKE WHAT!)
You want from me
