You are light  
The same energy that make the sun shine bright  
You are light, yeah light  
You're the energy  
Atoms and light  
Atoms and light

Sage's light  
Oh and Edison, he made two sparks ignite  
All you do, all you do  
It's scientific chain reaction  
It'l come back to you  
You, you, you, better do it right

In your flight  
Send your love out to the planet's soul  
'Cause all are one, all are one  
And all living things, they need some light to grow  
Oh, ooh, oh, ooh, oh, ooh  
Light

You are light  
You're the energy  
Oh  
Oh, light  
Oh, oh  
The energy
