Gypsy fever
I've been here many times
the motels
the trailers
the netted tents
of the road
been on these lands
through space time
in my own time
on my own time, baby
Independently wanting you
I've been wanting you
Baby, I want you
I've been wanting to
what's a woman to do now?

Lover that's right, lover

Me and my friends
somewhere on the road
child and dog play
winds, they blow
and blow
happy birthday, thirties
what do I want?
my candles glow
Baby, I want everything
just everything
Baby, I want everything
that you can bring
'cause my heart needs to sing now
lover that's right, lover

You are here
music in my ear
a wild dear
a magic potion
hold me tight
angel of the night
hold me right
'cause my love is the ocean

give you everything, just everything
Baby, I want everything
that you can bring
to set the night in motion
Lover that's right, lover
Set the night in motion
Lover that's right, lover
to set the night in motion
lover, oh that's right
lover that's right
lover, oh that's right, lover for all time
music through the night, oh
I hear the music of the night
And I'm here lovin you, oh every night
baby I'm lovin' you, oh every night
baby I'll be lovin you, oh every night
baby I've be lovin you, oh every night
lovin you yes oh every night
