Sunny days turn to rain smiles turn into fake faces oh
The sky so blue fades to gray the light trembles into
darkness when your
Not here you used to shine so bright and now I can't
see the light of day
Since your gone, since you left me here oh oh yeah

Chorus:

And I can't take it anymore so I run back to you baby
you left my heart
Black and blue when you went away
Sha la la la Sha la la

The ocean waves come crashing at me and so do our
memories, as I lay on the
Cold hearted sand I look up and see a star, shooting
across the empty sky
And so I wish you back home

Chorus:

And I can't take it anymore so I run back to you baby
you left my heart
Black and blue when you went away
Sha la la la Sha la la

Remember the night you held me, laying by the lake it
was you and me you
And me and how things could be if you came back
home

Chorus:

And I can't take it anymore so I run back to you baby
you left my heart
Black and blue when you went away
Sha la la la Sha la la
