Breath - take it deep inside, inside your mind youç£-e
weak I see

Death is a word I know, a word you fear to hear from
me

Real are the things that are, the things that were, but
what will be

Deal - I will show you all, heed over, give your sins to
me

Free - now I got your hands, youç£-e mine my dear

Time - get your aims or be what you were here

Feel all that mud outside, turn ç£-ound and walk away
with me

All I want from you is just your soul

All the lies beyond their smiles, just take my face and
then youç£-e I see

I wonç£-e give you dreams you wake up from - taste my
reality

And I started to believe, that you want me to retreat

Forget that world outside, we better leave

Now itç£-e time to make your choice, get up and
choose eternity

Feel your wish itç£-e deep inside - bend over and
survive with me
