### "Every lovesong"

Visit "[Every lovesong](#)" on MotoLyrics.com

Every love song I'll sing for you  
Tell tonight is here for us  
On the dance-floors the night is so high  
We dance together under the sun  
Come on and take my hand  
They says the night don't wait  
I'll show you my best moves  
And we will be as one  
And we will always be together

The night has loved before  
The night is all we get  
I'll make my best tonight  
to be the one for you  
The night has loved before  
The night is all we get  
I'll make my best tonight  
to be the one for you
