(k. hain/m. goldenberg)

Here we are at the crossroads again
And neither of us knows the right way
So here we go trying to get by
The limits of our yesterdays
And if it brings us down
It wouldn't be the first time
Over and over, we put our hearts on the line

Chorus:

Everytime we fall
We get a little stronger, baby
Everytime we walk away
It hurts a little more
Someday we may find
We can make it last this time
Until then, we give it all
Everytime we fall (ohh)

When you're gone
Still burning me
And I'm jealous of the sun that warms you
And still I know
I'm walkin' in your dreams
And I ain't seen the last of you

Coz there's a part of you
That never really leaves
Over and over
You keep coming back to me

(repeat chorus)

Bridge:

When one road ends
There's always another one to try
So we're goin' through these changes
Time and time again
You and me, there's no good-bye
No good-bye

(instrumental)

Coz there's a part of you
That never really leaves
Over and over
You keep coming back to me

Everytime we fall, ohhh
I feel it's getting stronger, baby
Stronger, baby. stronger, baby

(repeat chorus)

Everytime we fall
(only makes us stronger)
Everytime we walk away
(hurts just a little bit more)
Someday we may find
(we can make it last this time)
Until then we give it all
Everytime we fall

Everytime we fall
(we get a litle stronger baby)
Everytime we walk away
(hurts just a little bit more)
Someday we may find
We can make it, we cam make it
Until then we give it all
Everytime we fall
