You don't look the same to me
You don't look the same

He was a quiet boy who walked in the shadows
He had to live like that to avoid the spotlight
He only spoke if he was forced to answer
If you never get involved, you avoid the attention

You don't look the same to me
You don't look the same

The others never knew what secrets he was hiding
It was impossible to see through his armour
He'd never tell you where he kept the hidden key
No one ever tried to help in any way

You don't look the same to me
You don't look the same

All grown up, he left the school that was his hell on
earth
Not knowing where to go, the future was a blur
He knew he had to fight to get away from here
All we really want in life is to be loved

You don't look the same to me
You don't look the same
