Music by Leaf

Take a little time, take a piece of mind,
Look around you and feel the life in you
Feel it in me, take a deep breath
Feel the music
To all my people on the left, keep on
All my people on the right also
All my people in the front and in the back
you know where it's at
Memorise to never forget

Music is all we got
Music is all we got
Music is all we got
Music is all we got

This for the people who we love to love
and keep close to the hearts now
All our friends we level with and never leave our
thoughts we,
shine our minds like a day in the summertime
Like Bob Marley yeah everything will be all right
Keep the future bright and keep laughing
unmasking the face of the world while we at it
With music we're sharing,
we got together in service of rocking crowds truth, our
passion
But understand it's all about being
Cause it's really all of you that give us meaning
(meaning)
You refuel us with the spirit to grow
It's leafmusic bless your soul

Music is all we got
Music is all we got
Music is all we got
Music is all we got

Music is all we got, we keep singing from the heart
