Love is a lot like a garden  
You throw your whole heart into  
Once I was easily started  
The hard thing to do  
Was following through

*[Chorus]*

But I want to with you  
Make a love that will last forever  
I want to with you  
make a life we can live together  
Baby I promise you  
Every time I laugh  
Every tear I cry  
Every long night I live through  
I want to with you

Life is a lot like a battle  
When love is under attack  
Once I was easily rattled

I'd run just like that  
I wouldn't fight back

*[repeat chorus]*

Once upon a lonely time  
I didn't want to share my life  
But now I find in everything that I do  
I want to with you

Baby I promise you  
Every time I laugh  
Every tear I cry  
Every long night I live through  
I want to, I want to, oh with you  
Oh I want to with you baby oh yeah  
I want to with you  
I want to with you  
I want to with you
