Daylight comes daylight goes daylight's warm  
daylight's cold  
There's no need to rush this night do it with relish  
With as little anguish as you can manage  
Never get above it don't go ashtray on me now  
Leave out the innuendo at least create inferno  
Daylight comes daylight goes daylight's warm  
daylight's cold  
Daylight it's long daylight short daylight comes  
daylight goes  
You walk on the side of Elvis and Jesus Christ  
It's not the same as the dream it's what you want things  
to be  
And don't forget the big remote control controlling your  
soul  
Are you the party leader and you just don't need her  
Your fucking bleeding her fucking bleeding her  
bleeding her  
Daylight comes daylight goes daylight it's warm  
daylight's cold  
Daylight it's long daylight short daylight is what that's  
for  
Daylight comes
