

Leatherface "Peasant In Paradise"

Visit "[Peasant In Paradise](#)" on MotoLyrics.com

I lived here last summer we could smell the drains
While we watched the stinking flies eat what they could
find
Well it was all so nice a peasant in paradise
And we will remember this we got burned and never
realised
That in my mind I should have realised
I lived here last summer we lived with all that sweat
When all we really wanted was to freeze to fucking
death
And all too soon the flowers died it came pissing down
with snow
We all went down with the cold if I had flu where did I
go
And it was all so nice a peasant in paradise
And we will remember this that we got burned and
never realised
That in my mind I should have realised
I lived here last summer it was better than dying cold
While we watched the scorching sun we all went blind
and died
It was all so nice a peasant in paradise
Well we will remember this
It was all so nice a peasant in paradise
And we will remember this we got burned never
realised
That in my mind I should have realised that we got
burned
I never realised that we got burned
