Now that I join the flank  
I'll move along the back  
You will survive the fight  
Soon leatherwolf will strike  
Battle has just begun  
You'll see the rising sun  
Until the child will  
The leatherwolf can kill

Now when we raise the whip  
Then you will feel the crack  
If we don't wake the dead  
We'll take your life instead  
Striking light to jaw  
We can entrance ya  
And so the child will  
The leatherwolf can kill tonight

Unleash and command  
Run from his bite  
The full moon is near tonight  
Thrust power and light  
Lunge with the pack  
Devour and strike tonight

Now that I join the flank  
I'll move along the back  
You will survive the fight  
Soon leatherwolf will strike  
Battle has just begun  
You'll see the rising sun  
Until the child will  
The leatherwolf can kill

Unleash and command  
Run from his bite  
The full moon is near tonight  
Thrust power and light  
Lunge with the pack  
Devour and strike tonight
