Chorus -

Dear babe I'll always love you and every night I think of
you
Cos baby our love is strong
Dear babe you're constantly running through, through
my mind
I promise in my heart you'll find, baby

Verse 1 -

It doesn't seem a big surprise to me
How I fell in love with such a queen
I would give her everything she needs
Cos deep inside my heart she is everything
I try my best to keep the love alive
And in the end she's turned away and cried
Love is crying and my heart is true
I have one thing to say and that is I love you baby

Chorus

Verse 2 -

I'm thanking you for the times we shared
For every moment that you said you cared
I didn't tell you but it meant a lot
To know that u loved me no matter what the cost
I guess I'm tryna say that in the end
All I really wanted was just a friend
I'll always be calling you baby boo
Cos in reality I'm still in love with you baby

Chorus

Bridge -

When we fell in love my heart just fell apart
Cos I knew I couldn't live without you next to me
I need you right by my side so you can feel my honesty
Dear babe I'll always love you down in my heart

Chorus
