Walking through catastrophe I came upon a clear

The world that turned its back on me had up and
disappeared

You tried to show me how to go
Into the air above the fear in us (in us, in us) the fear

Lifting despair it's coming clear to us (to us, to us) it's
clear

Out of the ashes left behind

Into the air
Living in atrocity I tried to make a change

Your visions of velocity were centuries delayed

You tried to show me how to go

Now I explode, now, now
Into the air above the fear in us (in us, in us) the fear

Lifting despair it's coming clear to us (to us, to us) it's
clear

Out of the vacuum of the mind

Out of the mask we hide behind

Into the air
Into the air above the fear in us (in us, in us) the fear

Lifting despair it's coming clear to us (to us, to us) it's
clear

This is the calm before the storm

Into the air we'll be reborn

Lifting despair it may appear to us, the sky is a
phenomenon

Out of the ashes left behind

Out of the shadows where we hide

Out of the black that robs the light

Into the air

Into the air
