People gonna talk about the things you do  
They're gonna talk, be it lie or true  
Night or day, day or night  
They're gonna talk be it wrong or right

People gonna talk about you anyway  
They're gonna talk no matter what you say  
Night or day, day or night  
They're gonna talk be it wrong or right

It seems they've just got to  
Yakety yakety yak  
Though they know best not to  
The moment you turn your back

People gonna talk until they're satisfied  
They're gonna talk until they make you cry  
Here right now, near or far  
They're gonna talk 'cause that's how people are

It seems they've just got to  
Yakety yakety yak  
Though they know best not to  
The moment you turn your back

People gonna talk until they're satisfied  
They're gonna talk until they make you cry  
Here right now, near or far  
They're gonna talk 'cause that's how people are

They're gonna talk 'cause that's how people are  
They're gonna talk 'cause that's how people are  
They're gonna talk 'cause that's how people are  
They're gonna talk 'cause that's how people are  
They're gonna talk 'cause that's how people are
