From where we stand we're looking
the man in the moon
Right in the eye
I don't think I've ever been on a
mountain quite this high
And the way you just touched me has
got me climbing the walls
Tonight's the night, the time
is right
Somebody's gotta take the fall

Chorus:
Somebody's gotta take the fall
Fall in love and risk it all
We're on the edge
Who'll be the first to let go
You know love just can't be found
When both feet are on the ground
So I'm tumbling heart over heels

after all
Somebody's gotta take the fall

Somewhere I read a wise man said
the fortune favors fools
I guess that explains how lucky I've
been to find someone like you
I've always heard it's easier than
falling off a log
So here and now, someday, somehow
Somebody's gotta take the fall

Repeat Chorus

You know love just can't be found
When both feet are on the ground
So I'm tumbling heart over heels
after all
Somebody's gotta take the fall
