Let's go back, right back to the start of it all  
When you caught me by surprise  
The first time that we laid eyes  
Seems so long since we had time on our side  
When the love is all we had  
But life changed our circumstance

Tell me your name i'll pretend i don't know you  
Just make me wait for you like it's the first time

Baby, we can be perfect strangers  
From across the room before you changed my life  
Baby, we can be perfect strangers  
No strings attached just trying to catch your eyes  
Strangers in the night  
Strangers in the night

Let's stay up all night to the break of the dawn  
Brand new lovers to explore and we needed nothing  
more  
Walk this way with me, let's lock all the doors  
Forget everything you know, can we just let it go

Tell me your name i'll pretend i don't know you  
Just make me wait for you like it's the first time

Baby, we can be perfect strangers  
From across the room before you changed my life  
Baby, we can be perfect strangers  
No strings attached just trying to catch your eyes  
Strangers in the night  
Strangers in the night

Baby, we can be perfect strangers  
From across the room before you changed my life  
Baby, we can be perfect strangers  
No strings attached just trying to catch your eyes  
Strangers in the night  
Strangers in the night
