Stand Still by Leeland  
Broken hands and tattered  
clothes  
Off the sides of busy roads  
These are people, these are souls and  
Their helps in our control  
But "busy roads" is where we stay  
Busy lives is just the way  
How we live life today  
Am I the only one afraid?

We're moving too fast and it's blinding us  
The speed that we're in is just too quick for love  
There's so many problems that we could fix  
If stopping is all that we do in their midst  
It's enough to feel  
All the pain in the world that needs to be healed  
If we just Stand Still

The love of God is in the streets  
In the people that we meet  
On the faces of the weak  
We look and see God's strength  
And are there any who will go  
Forsaking lands and leaving homes  
All so broken hearts may know that  
God will mend their souls

We're moving too fast and it's blinding us  
The speed that we're in is just too quick for love  
There's so many problems that we could fix  
If stopping is all that we do in their midst  
It's enough to feel  
All the pain in the world that needs to be healed  
If we just Stand Still

We need to look around us  
We need to look around us  
We need to look around us
