

Lefay "Save Our Souls"

Visit "[Save Our Souls](#)" on MotoLyrics.com

this is the code that will save us
it's breaking the silece of earth
the cry for salvation is calling from here
out through the dark universe

somewhere above the waste lands
beyond this infected world
perhaps in another dimension or time
the message the code will be heard

save our souls - save us
save our souls - save us

year after year it continues

from under the surface of earth
day after day populations decrease
by somekind of unknown disease

save our souls - save us
save our souls - save us

infection
humanity falls to decay
destruction
the source of infection remains

save our souls - save us
save our souls - save us
save our souls - save us
save our souls - save us
