Say goodbye... honey leaves for today
Got the time, and this lonely road awaits
Swearing release by the fire in your eyes
Take me far, far away from everything
Softly she cries so afraid

Don't leave me here saving the world
I'm so alone hold me don't let me go now
Here withholding the sun shaped out in light
Hold me don't let me go tonight

Slide away... while there's nothing to say
It's the end, it's the passing of a day
Faded beneath by that fire I'll subside
I'm so far, far away from everything
Softly she cries in her sleep

Chorus (2 times)
