It's just that side of me
A shelter from your storm
And only you can see me here
And if I concentrate
I'll think of better things to say
And you won't feel so lonely
It's just that side of me
To bring you up when you're shot down
I know you'll be around
Chorus
For what it's worth I'll call you catastrophe
It's the most beautiful name I know
And if you come to me in hard times
I'll give you everything you need
And you can call me therapy
And if I fall away
You know that I'll be back someday
To help you through the next one
And if I try today

To pick up on my past mistakes
Maybe you'll forget them
It's just that side of me
To bring you up when you're shot down
I know you'll be around
Chorus
For what it's worth I'll call you catastrophe
It's the most beautiful name I know
And if you come to me in hard times
I'll give you everything you need
And you can call me therapy
Chorus
For what it's worth I'll call you catastrophe
It's the most beautiful name I know
And if you come to me in hard times
I'll give you everything you need
And you can call me therapy
