[Barthold/Holmberg/Wiklund/Masspublishing]

At the side of the world I watch your painless face
It's a veil that covers all the falsehood that you carry
It is true, it is true that I've never been here before
Now, that's a lie, that's a lie that has been used before

All the shining light
They've hidden away inside
All the dying light
The light shines black inside

At side of the world I watch the painless ones
I am an insect waiting to be devoured
It is true, it is true that I never wrote these words before
Now, that's a lie that we reuse everytime we are alone

All the shining light
They've hidden away inside
All the dying light
The light shines black inside
