I'm slipping away and I cant sleep at night again
My loneliness fades to a place thats deep within
And I cant tell you how to feel inside
And all I can do is make sure, this is right

To crush him one last time,
To take him off your mind,
To crush him one last time,
To take him off your mind,

Your letting me drown and I just reach up for your
hand,
You pull it away, and i just don't understand,
And I cant tell you how to feel inside,
All I can do is deal with the pain in lies,

To crush him one last time
To take him off your mind
To crush him one last time
To take him off your mind

I cant tell you how to feel (how to feel),
All I can say,
is that im never letting go, never letting go,
I dont know if this is real (this is real),
All that I know,
is i'm never letting go, never letting go,

To crush him one last time (Crush him, love him, kiss
him, touch him),
To take him off your mind (Take him off your mind),
To crush him one last time (Crush him, love him, kiss
him, touch him),
To take him off your mind,
