Tangle the night sight
Caught in the eye
Needle and thread,
Needle and knife

I'm in the room and
You're in the bed with her
I see the unseen
And I am feeling just like

A telescope, I turn my eyes away
Cause I know
It's more than I can take
Telescope yeah
I can see the ending
I can see the ending down
And I can't come down

A quiet kisser, unending doubt
All smoke and sin, black it all out
Fade in a blur, and
Fade in the light
You empty your glass you leave me behind

And I'm inside the
Telescope, I turn my eyes away
Cause I know
It's more than I can take
Telescope yeah
I can see the ending
I can see the ending down
And I can't come down

Who, ho, who, ho, who, ho
Telescope yeah
I can see the ending
I can see the ending down
And I can't come down
I found out.
