### "Still Rappin'"

Visit "[Still Rappin'](#)" on [MotoLyrics.com](http://MotoLyrics.com)

[CHORUS]

"You know when the day comes I'll still be rappin'  
You know when the night comes we'll still be rappin'  
Way back in the past days people were rappin'  
Way up to the last day's we'll still be rappin'"

[Abstract Rude]

Underground news updates on the hour,  
they come around the crew I see the great rhyme  
power  
freestyle, Improv, Impromptu,  
bob your head to feel the rhythm so bomb you  
want to dance we let the mic change hands  
like a hot potato our attraction to hip hop is fatal  
we're connoisseurs on tours in a Winnebago  
lick shots for my spots in Diego

[Aceyalone]

We came up learned those ways living in a time  
when raps and shows paid trifling days everybody  
got to eat but we all need food for thought  
caught up in a real live struggle to the grave  
some are just sick cause they wanna' be saved  
by the preacher man but  
I'm ah reach you men open them up way back when  
African we was still rappin and beating on skins  
what the people say gotta' shed a little bit of light  
my insides is a beauty that is way beyond comparison  
and I just wanna share it all with you

(Chorus)

[Mikah 9]

Let your mind be free let your heart and your soul  
Just grow and let your life succeed as you wind on  
down the road  
and let it be open your eyes so you see  
open up your ears and what appears it's something  
true and clear  
and I hear transprojection is love metaphysically here it  
is

I'll keep it in my soul, so I will show no fear were  
transmitted  
I'm loud and clear as for those who see the light  
behind the rhymes of Mikah 9 they know the time  
And I see you and you make it through some of you  
don't hear me  
All I can say is it's all love and that's the way it gotta be  
Must we rob, rape, and murder one another for  
eternity?  
As concerned to me  
I would much rather we try to help each other  
All the way down the road but almost every time I turn  
around  
I hear the sound of bullet rounds fly through air  
I'm well aware we're not prepared to  
have conversation with celestial anatomy  
of Hereon and day by day we study in astronomy  
and converse in astrology and Hereon  
Live my days so let's partake so let's all take flight  
We used to love light to guide your way through fright  
and all of those spy satellites  
It's called love, my friend  
I must transcend on wish and waggle will  
and this is where my story ends

(Chorus)
