My one night stand, my summer fling
Came as fast as she left me
Oh, it's such a tragedy
We both had way too much to drink

This empty bed, the long drive home
Leaves me crushed and most alone
You came and left way too soon

I'd do anything for you
I'd do anything for you
I'd do anything for you

You bring me
You bring me
You bring me down
Down yea, down no

You bring me
You bring me
You bring me down
Down, down, down

I met her in the rock show crowd
The band was playing oh so loud
Touch me, feel me hold me close
Feels so good only heaven knows

She got all the glamour of Hollywood
I can't be with what I should
I love your sweat on my skin

Feel these words they're sinking in
Feel these words they're sinking in
Feel these words they're sinking in

You bring me
You bring me
You bring me down
Down yea, down no

You bring me

You bring me
You bring me down
Down, down, down

I love to hate you
Hate to love you
What could I do?
What could I prove?

So long, so long, so long
I can just scream, I can just run
How come you always do me wrong?

You bring me
You bring me
You bring me down
Down yea, down no

You bring me
You bring me
You bring me down
Down, down

You bring me
You bring me
You bring me
You bring me down
Down yea, down no

You bring me
You bring me
You bring me down
Down, down, down

I love to hate you
Hate to love you
What could I do?
What could I prove?

I can just scream at the top of my lungs
How come you always do me wrong?

Down, down, down, down
