Suddenly I'm alone again  
Suddenly I have to pretend  
That we're in love soaring high above the atmosphere  
But I can't see clear, but I can't see clear

I need painkillers just to be, just to be with you  
I'll take painkillers just to be, just to be with you  
Let's lie beneath the stars and cry  
When I get down I get high

But suddenly I'm yours again  
Suddenly I have a friend  
But suddenly I can't get no satisfaction  
All from a chemical attraction, all from a chemical  
attraction

I need painkillers just to be, just to be with you  
I'll take painkillers just to be, just to be with you  
Let's lie beneath the stars and cry  
When I get down I get high  
When I get down I get high  
I get high, I get high, I get  
I get high, I get high, I get high, I get

I need painkillers just to be, just to be with you  
I'll take painkillers just to be, just to be with you  
Let's lie beneath the stars and  
Let's lie beneath the stars and  
Let's lie beneath the stars and  
Let's lie beneath the stars and  
Let's lie beneath the stars and cry  
When I get down I get high
