"God = Mass Hysteria"

God is so great what a lot of crap and deceit
it's all bullshit he never really existed
believe the lie invented to control you all

Lies! God doesn't exist, he's just human invention
this creature is used to suppress all the people
and some fundamentalist will start a war in his name
while god, allah, ganesha and boedha are all the same

Just imagine that jesus would come back right now
we would all say he's no son of god, he's crazy
all religions are just stories about good and evil
they will just use other metaphores and different
names
