Why do we all have to work that much ?
I have no more energy
when I come home I've more things to do
but then I am too lazy

The graveyard shift
walking like a zombie
getting up too early
isn't good for me
I have only slept 5 hours
and I'd like to sleep much longer
but at 7 I have to get up
out of my bed and go to work

at least 8 hours each day I've to work
when I come home I'm broken
I'm too tired to do anything
I need more time for myself
