To set the record straight  
My head will be a library  
Where you'll find me  
To let it slip away  
Would be a tragedy  
'Cause that is where you'll find me

I'll meet you at the top of memory lane  
And we'll be fine if you'll recall my name  
I'll meet you at the top of memory lane

To fall a little more into what we learned before  
Now, in the early hours  
To call it what it's called  
A moment to remember  
Way back when

I'll meet you at the top of memory lane  
I'll meet you at the top of memory lane

And all the doors you could open and see what's  
behind them  
And all the ways that you could show her why you feel  
beneath her  
And all the time to cover up the truth I've hidden in  
there  
And all the things you learned so why don't you forget

I'll meet you at the top of memory lane  
And we'll be fine if you'll recall my name  
I'll meet you at the top of memory lane
