#### BODY GROOVE

You enter the floor / and your feeling the vibe  
When you dance take a chance / for a rock-n-roll'night  
Let your temperature rise / supersize, fantasize  
Cause music's alive / it will never never die  
Now you're startin to move / getting into the groove  
Shake your hips / lookin' for kicks  
The dancefloor is yours / you're a natural force  
Heart on fire, desire / like a power power source

You're getting it on / like a shaking machine  
Getting higher and higher / for a certain release  
It's as simple as that / you're escaping the dread  
How they're watching and judging / you're better than  
that  
Go with it, Go with it - Yeah / Go with it, Go with it - Yeah

Make your body move / gonna rock this town  
Make your body move / scream them suckers down  
Make your body move / gonna rock this way  
Make your body move / wave your hands for me

Now you're starting to go / with the natural flow  
Be inspired, admired / cause you like-a-like a show  
How your able to move / and so easy to prove  
How you tease and you tease / cause you wanna wanna  
please  
Breaking out of the cage / showing off on your stage  
You're the object of sex / they will never ever get  
And you fool with your eyes / playing games with their  
pride  
And it lies in your hands / if they get-a-get a chance

By the end of the night / you feel satis-satisfied  
Cause you're free and unleashed / for whatever you  
decide  
On the way to your home / you may seem to be alone  
but nothing else counts / than the memory of a fight
